

ZVEZA GEODETOV SLOVENIJE IN CELJSKO GEODETSKO DRUŠTVO VABITA NA

**44. GEODETSKI DAN****Z NASLOVOM****ZemljoVid za dobro odločanje**

četrtek, 3. marca, in petek, 4. marca 2016, v Laškem

V četrtek, 3. marca 2016, bo potekala slavnostna akademija v počastitev 5. evropskega dneva geodetov in geoinformatikov ter praznovanje 60. obletnice Geodetskega zavoda Celje, v petek, 4. marca 2016, pa strokovni posvet z naslovom ZemljoVid za dobro odločanje.

Tema tokratnega geodetskega dne bo povezana s kartami, kar nakazuje že naslov prireditve, v katerem smo uporabili star slovenski izraz za karto znanega kartografa Petra Kozlerja – ZemljoVid. Tematika sovпада z mednarodnim letom kart, ki ga je razglasilo mednarodno kartografsko združenje ICA s podporo Organizacije združenih narodov.

Na posvetu nam bodo predavali ugledni predavatelji iz tujine in priznani domači strokovnjaki. Pri tem se bomo dotaknili širšega področja prostorskih podatkov, predvsem topografskih in katastrskih prostorskih podatkov. Razpravljali bomo o tehnologijah za zajem in obdelavo podatkov, metodah za zagotavljanje kakovosti, načinih njihovega posredovanja uporabnikom, ki se na podlagi teh podatkov odločajo pri vsakodnevem načrtovanju, upravljanju in rabi prostora.

Verjamemo, da bo predavanja popestrila spremljajoča razprava, saj je namen takih dogodkov tudi izmenjava mnenj in izkušenj. Zato lepo vabljeni k udeležbi na prireditvi!

44th SLOVENIAN LAND SURVEYING DAY

ENTITLED

ZemljoVid (Maps) for Good Decisions

to be held on 3 March and 4 March, 2016, in Laško, Slovenia.

To mark the 5th Day of the European Surveyor and Geoinformation, and the 60th anniversary of the Celje Land Survey Institute (Geodetski zavod Celje), the festal event will take place on Thursday, 3 March 2016. A professional conference entitled ZemljoVid for good decisions will be held on Friday, 4 March 2016.

The topic of the 44th Slovenian land surveying day will be linked to maps, as can be seen from the title of the event. Here, the old Slovenian expression for map is used – ZemljoVid, published by a well-known cartographer Peter Kozler. The event is also connected with the International Map Year, which was announced by the International Cartographic Association (ICA) and is supported by the United Nations (UN).

Eminent guests from abroad and professionals from Slovenia will give us interesting lectures in the fields related to spatial data, with the emphasis on topographic and cadastral data. Discussions will include the topics of new technologies for capturing and modelling of spatial data, methodologies for ensuring data quality and quality of our services, data distribution approaches to different users, who use this data for their decisions in everyday activities of planning, management and use of our space.

We believe that the talks will stimulate lively accompanying discussions since such events are also intended to encourage exchange of views and experience between the participants. You are cordially invited to participate in this event. For more information, please visit the website: <http://cgd.si/sl-SI/4477/geodetski-dan>.

On behalf of the Programme Committee:

Chair of the Programme Committee
dr. Dušan Petrovič

President of the Association of Surveyors of Slovenia
mag. Blaž Mozetič
