

Sedemdeset letnikov znanja, povezovanja in strokovne odličnosti

Seventy Volumes of Knowledge, Collaboration and Professional Excellence

mag. Toni Levičnik

predsednik Zveze geodetov Slovenije | President of the Association of Surveyors of Slovenia

Spoštovane bralke in bralci Geodetskega vestnika, drage geodetkinje in geodeti,

letošnje leto zaznamuje pomemben mejnik v zgodovini slovenske geodetske stroke. Pred nami je že **70. letnik Geodetskega vestnika**, osrednje strokovne publikacije, ki že sedem desetletij spremlja razvoj geodezije, v strokovnih člankih predstavlja strokovne dosežke, odpira prostor za razpravo ter krepi povezanost med generacijami geodetinj in geodetov.

Sedemdeset let ni zgolj častitljiva številka. Je sedem desetletij predanega dela urednikov, avtorjev, recenzentov, raziskovalcev in strokovnjakov iz geodezije, ki so s svojim znanjem, zavzetostjo in vizijo soustvarjali vsebino revije ter pomembno prispevali k razvoju geodetske stroke v Sloveniji. Geodetski vestnik je skozi desetletja postal mnogo več kot strokovna revija. Postal je kronist razvoja geodezije, zanesljiv zapisovalec strokovnih izzivov posameznih obdobj in dragocen most med akademskim okoljem, državnimi institucijami ter geodetsko prakso.

Ob pomembni obletnici se z iskrenim spoštovanjem ozremo tudi na delovanje geodetskih društev, ki pod okriljem **Zveze geodetov Slovenije** že desetletja negujejo razvoj stroke in krepijo stanovsko pripadnost. Društva s svojo aktivnostjo ohranjajo živ stik med kolegi, organizirajo strokovna srečanja, izobraževanja, ekskurzije in družabne dogodke, zaradi česar so nepogrešljiva za povezovanje slovenske geodetske skupnosti.

Prav društva so tista, ki skrbijo, da geodezija ni zgolj stroka, temveč tudi skupnost ljudi, ki jih družijo strokovnost, odgovornost in vrednote, na katerih geodeti gradimo zaupanje javnosti. Njihovo delovanje temelji na prostovoljstvu, osebni predanosti in pripravljenosti posameznikov, da svoj čas in energijo namenijo skupnemu dobremu. V imenu Zveze geodetov Slovenije se iskreno zahvaljujem vsem sedanjim in nekdanjim predsednikom društev, članom upravnih in nadzornih odborov, organizatorjem dogodkov ter vsem članom, ki s svojim delom in prizadevanji prispevajo k vitalnosti naše stanovske organizacije.

Geodetska stroka danes deluje v razmerah izjemno hitrega tehnološkega razvoja. Umetna inteligenca, satelitske tehnologije, daljinsko zaznavanje ter vse večje količine prostorskih podatkov odpirajo številne priložnosti, hkrati pa pred nas postavljajo izzive in odgovornosti. Geodeti smo in bomo tudi v prihodnje ključni soustvarjalci kakovostnega upravljanja prostora, trajnostnega razvoja, nepremičninskih evidenc in sodobne prostorske podatkovne infrastrukture države. Zavzemam se, da bo geodetska stroka pri

prostorskem umeščanju prepoznana kot nepogrešljiv sogovornik in pomemben soustvarjalec odločitev o prihodnjem razvoju prostora.

Jubilej Geodetskega vestnika zato ni le priložnost za pogled nazaj, temveč predvsem za pogled naprej. Je trenutek, ko se s spoštovanjem in hvaležnostjo ozremo na delo generacij, ki so gradile ugled naše stroke, obenem pa prevzamemo odgovornost za njen nadaljnji razvoj. Prepričan sem, da bomo z medsebojnim spoštovanjem, odprtim strokovnim dialogom in skupnim delovanjem tudi v prihodnje uspešno odgo-varjali na izzive časa ter utrjevali vlogo geodezije v slovenski družbi.

Vsem, ki ste v preteklih sedmih desetletjih soustvarjali Geodetski vestnik, iskreno čestitam in se zahvaljujem za vaš prispevek. Naj Geodetski vestnik tudi v prihodnje ostane osrednji strokovni forum slovenske geodezije, prostor za izmenjavo znanja in izkušenj ter navdih prihodnjim generacijam geodetinj in geodetov.

Ob tej priložnosti vas iskreno vabim, da se nam pridružite na **Geodetskem dnevu 2026**, ki bo potekal 18. in 19. novembra 2026 na Gospodarskem razstavišču v Ljubljani. Pod geslom Geodezija brez meja bomo skupaj razmišljali o prihodnosti geodetske stroke, izmenjevali znanje ter krepili strokovne in osebne vezi, ki povezujejo našo skupnost.

Ob jubilejnem 70. letniku Geodetskega vestnika iskrene čestitke vsem, ki soustvarjate zgodbo slovenske geodezije.

Dear readers of Geodetski vestnik, dear fellow surveyors,

*This year marks an important milestone in the history of the Slovenian surveying profession. We are celebrating the **70th volume of Geodetski vestnik**, the leading professional publication that has accompanied the development of surveying for seven decades, documented professional achievements through its articles, provided a platform for discussion, and strengthened connections between generations of surveyors.*

Seventy years is more than just a remarkable number. It represents seven decades of dedicated work by editors, authors, reviewers, researchers and surveying professionals who, through their knowledge, commitment and vision, have contributed to the journal's content and made an important contribution to the development of the surveying profession in Slovenia. Over the decades, Geodetski vestnik has become much more than a professional journal. It has become a chronicle of the development of surveying, a reliable record of the professional challenges of different periods, and a valuable bridge between academia, public/government institutions and surveying practice.

*On this important anniversary, we also look with sincere respect at the work of all the surveying associations that, under the umbrella of the **Association of Surveyors of Slovenia**, have for decades supported the development of the profession and strengthened professional identity. Through their activities, the surveying associations maintain strong ties among colleagues, organise professional meetings, training programmes, excursions and social events, making them an indispensable link within the Slovenian surveying community.*

The associations are also instrumental in ensuring that surveying is not merely a profession, but also a community of people connected by professionalism, responsibility and the values on which we, as surveyors, build public trust. Their work is based on voluntary engagement, personal dedication and the willingness of individuals to devote their time and energy to the common good. On behalf of the Association of Surveyors of Slovenia, I would like to sincerely thank all current and former presidents of the associations, members of their executive and supervisory boards, event organisers, and all members whose efforts contribute to the vitality of our professional organisation.

Today, the surveying profession operates in an environment of exceptionally rapid technological development. Artificial intelligence, satellite technologies, remote sensing and the ever-growing volumes of geospatial data create numerous opportunities, while at the same time presenting us with new challenges and responsibilities. Surveyors are, and will continue to be, key contributors to sound spatial management, sustainable development, land and property records, and the country's modern spatial data infrastructure. I am committed to ensuring that the surveying profession is recognised in spatial planning and development as an indispensable partner and an important contributor to decisions concerning the future spatial development.

The anniversary of Geodetski vestnik is therefore not merely an opportunity to look back, but above all to look ahead. It is a moment to reflect with respect and gratitude on the work of the generations that have built the reputation of our profession, while at the same time taking responsibility for its continued development. I am confident that, through mutual respect, open professional dialogue and joint efforts, we will continue to respond successfully to the challenges of our time and strengthen the role of surveying in Slovenian society.

To everyone who has helped shape Geodetski vestnik over the past seven decades, I extend my sincere congratulations and gratitude for your contribution. May Geodetski vestnik continue to serve as the leading professional

forum for Slovenian surveying, a place for the exchange of knowledge and experience, and an inspiration to future generations of surveyors.

*On this occasion, I warmly invite you to join us at **Slovenian Land Surveying Day**, which will take place on 18 and 19 November 2026 at GR Ljubljana congress and convention centre. Under the theme *Geodesy Without Borders*, we will reflect together on the future of the surveying profession, exchange knowledge, and strengthen the professional and personal ties that connect our community.*

Congratulations to all those who are helping to shape the story of Slovenian surveying on the occasion of the 70th volume of Geodetski vestnik.
